DRUM PRESS TYPE FS 180 (35T)

DRUM PRESS TYPE FS 180 (35T)

BASE VERSION

- Extruding force 35T
- Drum extrusion from top by means of a 3" flexible hose
- Designed for the extrusion of both smooth and/or corrugated drums
- Hydraulic operation
- Drum reinforcing corset necessary for pressures above 6 bar
- Safety guards corresponding to current safety regulations

OPTIONS

- More rugged construction for high products viscosity with extrusion force up to 100T
- Possibility of connecting a volumetric dosing unit
- Possibility to connect together two drum presses with a 2/3 way valve for a constant feeding with semi-automatic or fully automatic version

Double drum press with 2/3 way valve
